

Web Developer - Javascript, HTML, CSS, PHP

Power Technology Research LLC (PTR) is a United States/Germany based bespoke market research company with a focus on power grid and e-mobility equipment market research. We are looking for a front-end developer to augment the website development and create web-applications for information visualization.

Your role will involve close collaboration with a small development and sales team to produce various mockups incorporating feedback from the prospects to get to the final version of the products and maintain them. Given our services and position in the market, you'll experience agile development and learn about growing a small company more than anywhere else, as you shape our client-end tech solutions along with the founding team.

What will you be doing (your tasks):

- Build high quality mockups and prototypes during the development stage using UX/UI best practices.
- Creating and maintaining customer facing website and web-apps integrating user feedback.
- Connection of these web-apps to back-end databases to ensure smooth update of the information at runtime.
- Implementation of visual elements and selection-based logins for unique customer experience based on the preferences.
- Integration of third-party services to automate in-house and customer facing processes like client preferences and follow-ups.

Who are we looking for (skills required):

- Bachelors degree in Computer Science, Software Engineering or related field.
- At least 2-years of practical experience in front-end development.
- Excellent command of languages: Javascript, PHP, HTML, and CSS.
- Strong knowledge of libraries and frameworks like jQuery, Angularjs, React.
- Experience integrating APIs from various providers into web-apps.

Your benefits:

- Flexible working hours with autonomy
- Experience working with an international team
- Market competitive monthly salary
- Knowledge of how a completely digitized, international company runs

If you are looking for a rewarding career, getting in on the ground floor of a fast growing, Agile, and international business, please send you CV to hassan.zaheer@powertechresearch.com. In case you have any questions, please do not hesitate to reach out.
