

Full Time- Junior Analyst

Power Technology Research (PTR) is a Munich based market research company with a focus on power grid and e-mobility equipment market research. Our aim is to change the way market research is provided to the customers by ensuring a highly transparent and flexible methodology in our analysis.

We are looking to hire Junior Analysts for our consulting group. The candidate should have the ability to think critically and comfortably navigate complex topics. Understanding key correlations between qualitative and quantitative information is important for the role. The candidate should be comfortable with calling new and existing clients or research participants to conduct market discussions. Ability to carry out primary and secondary research on a wide range of topics is extremely crucial for this role.

Your tasks will include:

- Carry out secondary research to mine data/information from publicly available reports/strategy plans from key stakeholders in energy sector.
- Conduct primary research in the form of expert interviews/discussions to gather insights and market trends.
- Quickly understand business models of equipment manufacturers and design surveys to obtain information.
- Analyze financial data and information gathered from primary research to provide insights on the competitive landscape of our client's market.
- Extract key market trends from large databases and create links with industry specific or macroeconomic trends.
- Generate technology comparisons, cost models and forecast models on given topics.
- Convert complex data and findings into understandable tables, graphs, and written reports.
- Prepare reports and present results to clients and management.
- Communicate with business leaders, financial officers and market representatives.

Skills required:

- BS in Electrical Engineering, candidates with Master's degree are also preferred
- Fresh graduates are encouraged to apply. Candidates with three to six months of job or internship experience in a similar role will be preferred.
- Excellent command on Microsoft Office
- Ability to manage multiple topics simultaneously
- Must be articulate, persuasive and eloquent in communication
- Previous knowledge of market intelligence is a strong plus
- Knowledge of data analytics tools is a plus
- Strong attention to detail and a strong analytical mind.
- Ability to notice patterns within statistics.

Your benefits:

- Learn about client interaction in a consulting environment.
- Work remotely with a diversified team of industry experts.
- Experience working with international team.
- Market competitive monthly salary.
- Knowledge of how a completely digitized, international company runs.
