

Full Time- Consultant

Power Technology Research (PTR) is a Munich based market research company with a focus on power grid and e-mobility equipment market research. Our aim is to change the way market research is provided to the customers by ensuring a highly transparent and flexible methodology in our analysis. We are looking to hire a consultant for our consulting group. Under the supervision of director consulting group, candidate will manage a team of researchers/Analysts to lead specific projects and act as a subject matter expert to deliver consulting projects. Candidate will be working with our clients in an international environment covering multiple areas and industries to improve and transform their businesses.

Your tasks will include:

- Be the lead person in all external communication of consulting group.
- Synthesize clear takeaways from complex information into clear takeaways and recommendations using both qualitative and quantitative methods
- Steer the research into right direction to meet client requirement while adhering to the deadlines.
- Manage/deliver several consulting engagements in parallel while acting as a bridge between researchers of consulting team and subject matter experts from syndicate team
- Interact with the clients to understand the research needs and convert that information into highly effective proposals.
- Establish trust-based relationships with clients to better serve their organizations
- Develop your leadership style, leveraging your own passions, strengths, and personal values
- Work effectively with diverse teams to come up with the best solution and move people and organizations to act
- Take client feedback into account to continuously improve the quality of work done by consulting group.
- Contribute to the development of your own and team's technical insight.
- Keep up to date with local and national business and economic issues.

•Skills required:

- Bachelor's degree; Advanced graduate degree (e.g., MBA, PhD, etc.)
- 4-5+ years of working experience preferred in the field of research
- Excellent communication and relationship management skills.
- Ability to manage multiple topics simultaneously.
- Strong drive and time management, ability to decide and prioritize independently.
- Analytical mindset with ability to identify areas for improvement and share solutions.

•Your benefits:

- You will become a senior-member of a well-established and highly collaborative virtual team.
- Experience working with international team.
- Market competitive monthly salary.
